

## **Asbestos Annual Notification**

This notice is to advise parents, teachers, students and all school employees of the Roman Catholic Diocese of Lexington, KY that all Catholic schools of the diocese have been inspected as required by the AHERA federal legislation for the presence of asbestos in school facilities, and are in compliance with both national and state regulations and laws. Micro-Analytics, Inc. of Louisville, KY performed the three year re-inspection during the 2022-2023 school year and developed or renewed plans for each school where asbestos content has been identified and made part of a management plan of the school system.

A complete asbestos management plan for the Office of Catholic Schools is on file at the Roman Catholic Diocese of Lexington, KY, 1310 West Main Street, Lexington, Kentucky 40508-2048. A copy of the asbestos management plan for each individual school is on file in the principal's office.

As required by AHERA, in addition to the required three-year inspection noted above, a trained person at each school inspects the conditions of the asbestos twice each year and records the results of this review. Federal regulations are also to be followed in remodeling work that might disturb asbestos-containing materials.

We will continue to inform you at least once each year on the status of the Asbestos Management Plan. Be assured that every precaution will be used to protect the well being of students and employees of schools within the Catholic Diocese of Lexington, KY.

\*\*\*\*\*
